BELVILLE'S GOAL IS TO PROVIDE CLEAN, SAFE WATER

TOWN OF BELVILLE – The Town of Belville is looking to the future and our goal is to provide safe, clean water to the community.

With the conveyance of H2GO's real and personal assets, H2GO's customers will still receive the award-winning customer service that they have always been given from H2GO, as well as at the same price for all customers. This transition will be smooth and seamless to ensure that water customers receive no interruption of service as this process goes forward. This is a move that must be made to provide our community with safe, clean water.

Levels of GenX and other contaminants have been severely under reported. Who would stop, blunt or undermine a clean water alternative to a known, polluted water source?

We currently have one water source and our citizens want a clean alternative.

Let's do more, be better and work together to find a safe solution for clean water.
