

Please be advised that the mosquito population at the Brunswick Riverwalk at Belville has increased over the past several days. The Town is working in cooperation with Brunswick County Mosquito Control to address this issue. It is recommended that if you visit the park that you take the following precautions:

- **Apply insect repellent to skin and clothing.**
- **Wear light or neutral-colored long-sleeved shirts and long pants when outside.**
- **Avoid areas of standing water that can be a breeding ground for mosquitos.**
- **Avoid using perfumes or fragrances outdoors as they are a mosquito attractant.**

Thank you for your cooperation.
